Summary

Data analyst with experience in credit and financial analysis, evaluating risk, building predictive models, and transforming financial, governance, and research data into decision-ready insights. Skilled in Python, SQL, Excel, Power BI, quantitative analysis, and credit assessment. U.S. Army veteran with 10 years of service and an M.S. in Data Analytics with a finance concentration, bringing disciplined problem-solving, clear communication, and strong attention to detail.

Technical Skills

Programming & Querying: Python, SQL, JavaScript

Analytics & Visualization: Pandas, NumPy, Matplotlib, Tableau, Power BI, Excel, Jupyter Notebook, Streamlit

Machine Learning: scikit-learn, XGBoost, SHAP, predictive modeling, model evaluation

Finance & Credit Analysis: Accounting Fundamentals, Credit Analysis, Financial Ratio Analysis, Adjusted EBITDA, Fixed Income Analysis, Portfolio Analysis, Investment Analysis

Data & Reporting: Data cleaning, exploratory data analysis, dashboard development, KPI reporting, ETL

Databases & Tools: MySQL, MongoDB, GitHub, VS Code, Google Colab

Projects

Credit Risk Scoring Model - End-to-End Machine Learning System | [View Live Project](#)

- Developed an XGBoost credit-risk model using Python and scikit-learn that achieved an 87% F1 score and 92% ROC-AUC while generating real-time borrower risk classifications with SHAP-based explainability.

AVOXI Billing Analysis - Telecom Billing Margin Optimization | [View Project Repository](#)

- Analyzed three months of telecom billing data totaling approximately \$84K using Python, Pandas, and NumPy, optimizing vendor routing and pricing to increase gross margin from 39.6% to 46.4%.

Education

Master of Science in Data Analytics

Conferred: May 2026

Concentration: Finance

Southern New Hampshire University

Bachelor of Science in Information Technology

Conferred: May 2025

Concentration: Full-Stack Programming

GPA: 3.85 | *Magna Cum Laude*

American Military University

Relevant Coursework: Intermediate Python Programming, Web Development Using JavaScript, MongoDB and Python

Experience

Junior Vote Execution Analyst | ISS STOXX

Norman, OK | December 2025 - Present

- Execute and validate 1,000-1,500+ institutional votes weekly across global markets, maintaining 99.7% accuracy and supporting timely governance decisions for international clients.
- Audit and reconcile 500K+ governance and ballot data points each season, identifying discrepancies and maintaining compliance with regional regulations and client policies.
- Collaborate with Operations, Data Quality, and Research teams to resolve complex voting discrepancies, reducing turnaround time by 18% through improved workflows and coordination.
- Develop Excel and Power BI reports that track vote volumes, exceptions, and audit trails, improving operational visibility for cross-regional teams and leadership.
- Automate recurring workflows using advanced Excel logic and Python, reducing manual effort and limiting processing errors during peak voting cycles.

Research Assistant - Data-Driven Computational Design (AI & Robotics) | University of Oklahoma

Norman, OK | May 2025 - Present

- Analyze 10,000+ data points from 3D-printing experiments using Python, Pandas, and NumPy to identify patterns affecting material performance.
- Support the development and validation of machine learning models that achieve up to 87% accuracy in predicting material strength.
- Design and automate ETL workflows that improve the efficiency, consistency, and reliability of experimental data preparation.
- Build Power BI and Matplotlib reports that translate experimental findings into decision-ready insights for AI and robotics researchers.

Senior Student Services Specialist | Supervisor | University of Oklahoma

Norman, OK | January 2023 - November 2025

- Maintained and analyzed student data to identify at-risk students, track degree progress, and improve communication strategies that promoted academic success.
- Developed Excel and Power BI reports for faculty and leadership, helping guide student-resource allocation and operational decisions.

Certifications

- PGIM Public and Private Credit Job Simulation | Forage | September 2026
- Standard Chartered Banking and Coverage Job Simulation | Forage | September 2026
- Microsoft Certified: Power BI Data Analyst Associate (PL-300), Microsoft (2025)
- Microsoft Certified: Azure Data Fundamentals (DP-900), Microsoft (2025)
- Google Advanced Data Analytics Professional Certificate, Google/Coursera (2025)
- Securities Industry Essentials (SIE) Exam Passed, FINRA (2025)
